ISM3232C

Module 10 Project: React Native Simple App

Instructions

Part 1

In Chapter 16 of the React and React Native text, begin with the section titled 'Installing and using the Expo command-line tool'. Complete all coding up to the section titled 'Viewing your app on Expo Snack'. Make sure your code compiles cleanly and runs. You can follow the steps to view the app on your personal device (Android or Apple); take screenshots to document your efforts. Submit your project to the GitHub repo.

Part 2

Next, begin with the section titled 'Viewing your app on Expo Snack' and import your GitHub repo submitted in Part 1. Take screenshots of the app running in the virtual interfaces.

There is no Canvas submission for this project, you will submit your work to a GitHub repository as described below.

Submitting your work

Once your project is complete, commit your files (source code and all screenshots from Part 1 and Part 2 on one document or presentation) to the provided classroom repository. Your instructor will clone and grade your repo after the due date for this assignment.

There is no Canvas submission for this project.
